Summary

Senior Software Engineer with 7+ years of experience designing and building scalable distributed systems. Expert in backend development using Python and Java, with strong experience in AWS, microservices, and CI/CD pipelines.

Skills

Languages: Python, Java, SQL

Technologies: AWS, Microservices, Distributed Systems, Docker, Kubernetes

Databases: MySQL, PostgreSQL, DynamoDB, Redis

Tools: Git, Jenkins, CI/CD Pipelines

Experience

Senior Software Engineer | TechNova Inc. | Seattle, WA | 2021 - Present

- Designed and developed scalable distributed systems handling millions of requests daily.
- Led architecture discussions and implemented microservices using AWS.
- Improved system performance by 40% through optimization and caching strategies.
- Mentored junior engineers and conducted code reviews.

Software Engineer | CloudBridge Solutions | San Francisco, CA | 2018 - 2021

- Built backend services using Python and Java in a microservices architecture.
- Developed CI/CD pipelines to automate deployments.
- Collaborated with cross-functional teams to deliver high-quality software.

Software Engineer | DataWave Systems | Austin, TX | 2016 - 2018

- Developed REST APIs and improved database performance.
- Worked on distributed systems and ensured high availability.

Education

Bachelor of Science in Computer Science | University of Washington | 2012 - 2016
