## Professional Summary

Final-year Computer Science student with strong expertise in **Python backend development**, **automation systems**, and **scalable data pipelines**. Experienced in building **secure backend services**, **REST APIs**, and **database-driven applications** using **Django**, **Flask**, and **FastAPI**. Skilled in **debugging**, **performance optimization**, and applying **Data Structures & Algorithms** to real-world problems. Passionate about **cybersecurity**, **threat detection systems**, and **building high-performance backend infrastructure**.

## Education

### Alliance University

B.Tech in Computer Science and Engineering

CGPA: **8.7**

Relevant Coursework: **Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks**

Bengaluru, India

12/2022 - 05/2026

## Experience

### Software Development Engineer Intern

Surya Digital | Bengaluru, India | 09/2025 - 02/2026

- Built **scalable backend services and automation workflows**, improving system reliability and data processing efficiency
- Designed and implemented **RPC-based services**, enhancing modular backend communication
- Reduced bugs by **~90%** using **automated testing, validation, and structured debugging**
- Developed **secure backend logic and request validation pipelines**
- Diagnosed and resolved **production-level issues**, improving performance and system uptime

### Python Backend Developer Intern

Zapuz Technologies | Remote | 11/2024 - 04/2025

- Developed **scalable Python-based REST APIs** serving **1000+ daily users**
- Optimized **database queries and backend workflows**, reducing latency by **50%**
- Implemented **Redis caching and efficient data pipelines** for faster response times
- Improved system reliability using **logging, exception handling, and modular architecture**

## Projects

### CareerBooklet – Microservices Platform

FastAPI, PostgreSQL, Docker, JWT

- Designed and developed **scalable REST APIs** using **FastAPI and JWT authentication**
- Engineered **optimized database schemas with indexing**, reducing **query latency by 30%**
- Built **containerized microservices architecture** for efficient data handling and scalability

### ServiceSphere – Backend Platform

Django, MySQL, CI/CD

- Designed and developed **scalable backend services** using **Django** for real-time workflows
- Optimized **MySQL queries**, improving **response time by 40%**
- Implemented **CI/CD pipelines** ensuring code quality and continuous integration

## Skills

**Programming:** Python, JavaScript, TypeScript

**Backend:** Django, Flask, FastAPI, REST APIs, Backend Systems

**Databases:** PostgreSQL, MySQL, Redis

**Core:** Data Structures & Algorithms, OOP, System Design, Debugging

**Tools:** Git, Docker, CI/CD, Linux

**Other:** API Design, Performance Optimization, Automation, Logging & Monitoring

## Certifications & Achievements

HackerRank – Software Engineer Certification

04/2025

MVP – Internship Program

Zapuz Technologies | 05/2025

Alliance Techathon Participant

05/2025

FastAPI & Async APIs Certification

Udemy | 06/2025
