SUMMARY

Python developer with 1–2 years of experience in application development, production support, and SDLC. Strong background in building configuration-driven systems and optimizing backend logic. Proven ability to support UAT processes, resolve production issues, and coordinate with cross-functional teams. Willing and ready to work in UAT and production support environments.

TECHNICAL SKILLS

Programming: Python, JavaScript

Backend Development: FastAPI, Django, REST APIs, Microservices

Frontend: React.js, TypeScript, NextJs

Databases: SQL (PostgreSQL, MySQL), Redis

Tools & Practices: SDLC, UAT Support, Production Support, Rule-Based Logic, Configuration-Driven Development, Docker, Git, CI/CD

Core Concepts: Data Structures, OOP, Debugging, Low Level Design, High Level Design

CORE COMPETENCIES

- SDLC & UAT processes
- Production support & defect analysis
- Rule-based / configuration-driven applications
- Python development for business logic
- SQL & database query optimization
- Cross-functional coordination (Business, QA, Core Systems)
- Timely resolution of production/UAT issues
- Technical documentation & change records

WORK EXPERIENCE

SDE INTERN | Surya Digital | Bengaluru, Karnataka

Sep 2025 – March 2026

- Developed and configured backend services using Python (Kotlin also used), applying **rule-based logic** for AI session history and banking transaction flows, ensuring adherence to internal guidelines and regulatory-like requirements.
- Provided **UAT support** including defect analysis, fixing, and coordination with business users to resolve issues before deployment.
- Delivered **production support** by analyzing reported issues and providing timely resolution, reducing production bugs by **90%** through automated testing and code reviews.
- Maintained technical documentation and change records for all developed modules.
- Collaborated with cross-functional teams (Business, QA, Operations) following Agile SDLC practices to deliver end-to-end project milestones.

PYTHON DEVELOPER INTERN | Zapuza Technologies| Remote

Nov 2024 – Apr 2025

- Developed new features for a production-grade backend system (1,000+ daily users), focusing on configuration-driven improvements and maintainability.
- Provided ongoing **application maintenance support (AMS)** and resolved live product issues, ensuring system stability during peak traffic.
- Optimized SQL queries and implemented caching strategies, reducing API response time by 50% and supporting UAT testing cycles.
- Participated in full SDLC phases: requirement understanding, development, testing, and deployment.

PROJECTS

CAREERBOOKLET – MICROSERVICES-BASED BLOG & JOB PLATFORM

- Built configuration-driven microservices (Auth, Profile, Blog) using FastAPI and Python, applying structured business logic and rule-based access.
- Engineered PostgreSQL database schemas with composite indexing, query optimization, pagination, and soft delete patterns, achieving **~30% reduction** in API latency and query execution time through connection pooling and prepared statements.
- Containerized all services using Docker with multi-stage builds, reducing image size by **40%**, and implemented API Gateway for centralized routing and request management.

SERVICE SPHERE – MULTI-CLIENT SERVICE PLATFORM

- Built a full-stack service platform using Django and MySQL with real-time availability tracking, secure payment flow, and transaction management ensuring atomicity for booking and payment operations.
- Optimized complex SQL queries involving multiple joins and aggregations, reducing average response time by ~40% through strategic indexing, query restructuring, and lazy loading techniques.
- Designed role-based access control (RBAC) for three user types with custom middleware, and deployed using CI/CD pipeline with automated testing for consistent releases.

EDUCATION

BACHELOR’S DEGREE | Computer Science & Engineering | Alliance University | CGPA: 8.7

2022 –2026

AWARDA AND CERTIFICATIONS

FASTAPI & ASYNC APIS | Udemy

June 2025

MVP | Zapuza Technologies

May 2025

ALLIANCE TECHATHON AWARD | Face Prep

May 2025

SOFTWARE ENGINEER INTERN | HackerRank

April 2025
